PREFACE

A few words about the research are needed.

First, it is important that I try to support the data with documents or media that support the data of each individual. This helps to validate and provide confirmation of the genealogy history recorded about a person and their families.

In United States history are numerous varieties of record types that have been preserved. Each of these records provide the trail of the people and their documented history. There are many sources that provide information of this documented history. In this book are footnotes of the source documents or places this research has been recorded. There are so many types of sources to mention here, but this book provides some of that information as recorded in my Family Tree Maker (FTM) file.

Some of the data has been found or learned but have no supporting documentation. Why? Because to maintain limited electronic files; and that some of the information has been discovered on many sources. In some cases, it is real information known by people of these families.

Countries may have been divided by different areas. It may be necessary to learn about a countries administrative divisions.

One other note about individual and family names. Each surname coupled with given names, there are many of the same name or combination of names. Therefore, other items such as birth, death, marriage, territory, and possible other items are required to ensure one has identified the current person or family.

It's important that you ensure that you valid a finding. Just because a name make look correct, it takes documented validation of at least 3 or more documents to prove that you found the correct individual or family.

Enjoy reading, but there is so much to learn. This document will provide a base for anyone wishing to do genealogy research or just adding to this family information.

RESEARCH NOTES

Doing genealogy research is a long term and time-consuming task. If one is doing it for real, they will collect a great amount of data about their lives, about the territory they lived, and learn about the integration of families. For this researcher, there is much learned that is way above what is taught about history in school classes. Research can include working with on-line resources and can include travel to obtain information and documentation from Federal, State, County, City, or towns from records they keep. Cemetery records are a great source found on-line via the Internet.

There are many avenues why folks do genealogy research. For this researcher, I am not writing a book, I am trying to learn of past family and a small bit about them. I am not recording every detail that is possible. If I did, I would not be able to share what I have discovered in this book and I would still be on the road to discovery.

What is in this book is free to all to read, print, or share as they desire. This information is public and can be found by others; therefore, I am not doing this for any monies or profit, just for the pleasure of doing this research and a great retirement hobby for me.

This research has been ongoing since 2000 to compile and record in the attached book. There are many resources, these are just some of them.

The following is a sampling about what I used to do research.

1. Ancestry.com [<https://www.ancestry.com/>] web site. (Pay to use)
2. "Family Search" [<https://www.familysearch.org/en/>] (Free to the public] web site that is open to anyone. This site is created and supported by The Latter-Day Saints in Salt Lake City, Utah (aka Mormon Church or LDS).
3. Internet browser to search by varies names or phrases does help locate some information.
4. Primary source documents such as: US Census, Birth, Death certificates, cemetery records, civil documents, and immigration records or other documents that support the validation of family names and their link to relatives.
5. Find-a-Grave: [<https://www.findagrave.com/>]. In the attached files you may see the term "**Memorial ID**" with a number sequence. By going to the Find a Grave web site and entering this Memorial ID, that will take you to the grave information that has been recorded by folks who go to cemeteries and document the graves. In some cases, you will see the grave maker and other information folks have recorded for that person. In some cases, there are links to parents, siblings, and children along with spouses that all a Memorial ID recorded.
6. Historical Societies and Internet Genealogy resources

NOTES:

1) ANCESTOR: Also known as a forefather, fore-elder or a forebear.

2) DESCENDANT: Are descending after a forefather, fore-elder or a forebear.

- **Meaning of “direct descendant” as opposed to “indirect descendant”**

1. A direct descendant is someone who can trace their lineage by "child" relationships all the way back to the desired ancestor.
2. A non-direct descendant has to go through a "cousin" or "by marriage" or some other non-child relationship in order to find the desired ancestor.

Definition of genealogy.

1. An account of the descent of a person, family, or group from an ancestor or from older forms.
2. Regular descent of a person, family, or group of organisms from a progenitor or older form: pedigree. The study of family ancestral lines.

My research is recorded in *Family Tree Maker version 2019*. <https://www.mackiev.com/ftm/>

An add-on program titled *Family Book Creator* is used to create this book.

<https://www.familybookcreator.com/en/>

Research is aided with use of *Adobe Photoshop Elements & Adobe Acrobat PDF* maker. Adobe web site: <https://www.adobe.com/>

Adobe Reader for all computers: <https://get.adobe.com/reader/>

- This allows you to read any Adobe PDF (built for a computer operating system) file like the ones with this report.
- Just be sure to Uncheck the items before downloading if you don't want them.

In some cases I used Microsoft Word from MS 365 software suite.

I use *Kaspersky Internet Security* virus software. It is the best one that I found to do the job. <https://usa.kaspersky.com/>

Today, I have over thousands of names in files and many documents (or “Media”) in my files including photographs. Backup is on DVD/CD and Thumb Drives and on Cloud storage.

Just be sure if you decide to do genealogy research to support your recordings with valid and correct documentation. Read that documentation to be sure it applies to your person or family researching. I have found errors in other postings and even in some published books. Please beware of what you record to be factual and valid!

DEDICATION

A comparatively modest present,
but the good of which I can give.

Many thanks to my wife's cousin Terry and her friend Casey who helped me begin the journeys into genealogy in the year 2000.

The beginning of this effort got started from a few notes from my uncle and my wife's mother.

A few genealogy classes, reading, and great help from many people and the Internet all contribute to this effort.

I have learned much that allow me to seek the ancestral and descendant trails for the families presented in this book.

What is Genealogy?

A record or account of the ancestry or descent of a person, family, group, etc. the study of family ancestries and histories. Descent from an original form or progenitor; lineage; ancestry of people.

It is important to support the family presentation with verified documentation. Those links of that documentation should be recorded to provide validated:

- 1) Accurate Results.
- 2) Correct Postings.
- 3) Reliable Sources.
- 4) Factual Information to a *Nuclear Family*.

A *nuclear* family is a one set of parents and their children.

"Only who knows his past has a future."

Wilhelm von Humboldt (1767-1835)

Foreword

This book contains the facts, who, where, when, but not the story of **A FAMILY**. But it is the story of **MANY FAMILIES** along with some information of basic facts and notes.

It is about the descendants or ancestors of the surnamed person related to all people listed in this book. Note: over time the surname may change as this was due to a language interpretation of the words from another language to English. In some cases, it is how a person hearing a name pronounced and thought what they heard and consequently spelled the name differently.

Another fact, naming of children was set forth by family protocol in family history. Therefore, caution is required as one will see the same names in many families resulting with the same names used very often and can only be identified by birth and death dates and/or other factors.

It is amazing how often there is a close resemblance for relatives separated by generations.

There are many paper trails of recorded facts and information. The discovery of those paper trails helps find the information about families that provide the ancestral connections to people. This book is about those finding but begins with a known person and provides their descendants or ancestors and all related folks that have been recorded in my files.

DISCLAIMER

The program creating this book is a great tool. It uses data from the Family Tree Maker (FTM) data base; However, the words or sentences that this program provides can, sometimes, or may not have the proper syntax of the English language. That is not an error, but it is a terrific programming task to make all the syntax blend with the data from FTM as best as possible. It is also dependent on my input that would help make the syntax of sentences look wrong when it may not be the case. It could be my error in data entry. Images are low resolution created FTM.

Introduction

The following pages list data for all known family members as of August 07, 2021.

Each immediate family is presented in their own section that contains a graphical family tree as well as a description with information about each referenced person and their children.

The child section provides information about the children of the preceding couple. When a child has offspring of their own this is presented in a separate family section for that child. In this case a '+' is used to denote that an individual will appear later in the book as a parent with his/her own children and there is a link to the appropriate family reference number.

For children with partners but no offspring the partner data is given with the reference family.

Roman numerals, followed by a period, are used to indicate the birth order.

In the chapter titled "Family of the Starting Person" the ancestors of Delbert Patterson are presented in a kind of enhanced Pedigree Chart which displays the graphic representation of their direct-line ancestors and the children of the couple. This chapter contains information about the couple whose ancestors are listed in the later chapters.

The chapter titled "<HeadlineFamilies>" provides details (as known as of this publication date) for the ancestors of Delbert Patterson.

There is a chapter for each generation.

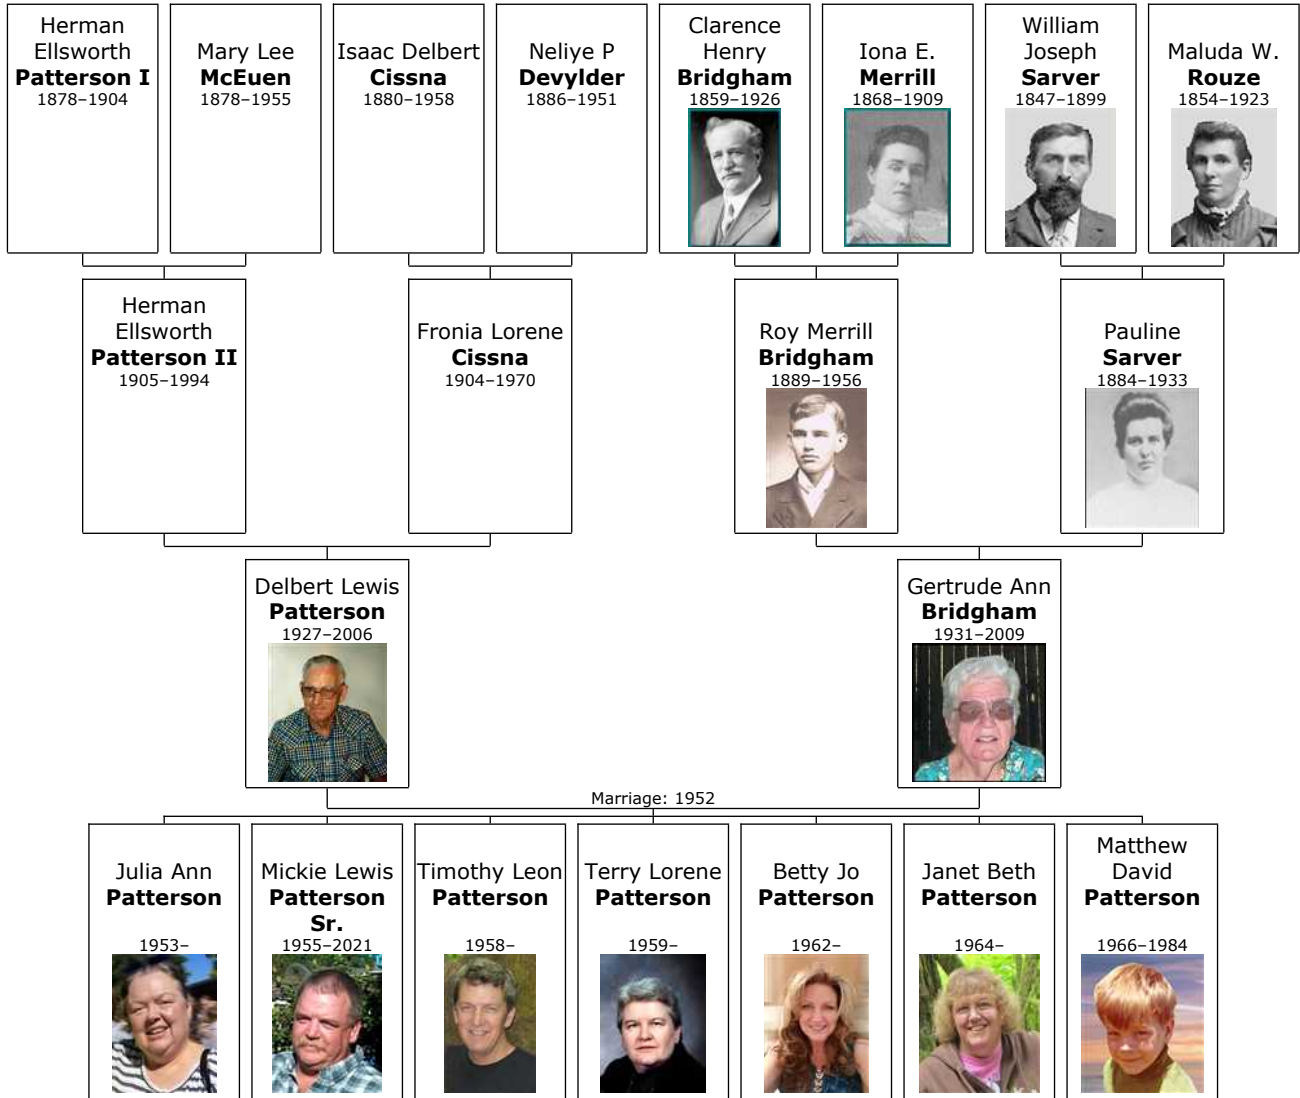

Relatives are listed in the order of the nearness of their relationship.

Sources for the information provided are given in the footnotes.

This document reports the details of 95 individuals, of whom 43 are male and 51 are female. The sex of one individual is unknown. Of the 74 individuals with recorded birth and death dates, the average lifespan was 58.3 years. Of these, 37 males averaged 59 years, and 36 females averaged 58.9 years. The longest living male was Shelby West (1902–1997), who died aged 94. The longest living female was Ann Scott (1663–1792), who died aged 129.

Gertrude Ann was born in San Jose, Santa Clara, Ca., US (Santa Clara County Hospital), on Thursday, July 30, 1931.^[3-5] She was the daughter of Roy Merrill Bridgham and Pauline Sarver.

Gertrude Ann reached 77 years of age and died in Stockton, San Joaquin, Ca, United States of America, on May 13, 2009.^[3, 5] She was buried in Georgetown, El Dorado County, California.^[3]

Person Notes Gertrude Bridgham was known as "Gertie" to her many family and friends.

Gertrude was the baby of the family. She did not know her mother as mom passed away when Gerturde was two years old. Raised by her father along with her brothers and sisters, Gertrude was often referred to as the "quite little kid" of the family. She enjoyed school and church choir and can belt out great turns. Her family was her greatest possession but as a wife and mother gave birth to seven of her own children. Gertrude and her family became the center of the family gatherings when her and Delbert moved to "the hill" in Garden Valley, California. With such a large family, and most of the brothers and sisters living in the area, the Patterson home was a typical family gathering. Food, music and good times were maintained as the Bridgham family had found in their Santa Clara life.

Gertie began her career working at the Rosecrans Museum in San Jose, California as a mail clerk. This business was for the preservation and presentation of Egyptian artifacts.

While at a USO dance, Gertie meet Delbert Patterson. After they married, Gertie became a devoted wife and mother. Living in Kentucky and California, moving where ever Delbert found work and developed his career as a builder of homes.

Gertie is the youngest of the Bridgham children and found a great live with her family. She was a talented cook. Delbert who was raised on a farm and enjoyed planting large gardens provided the family with many vegetables and a large supply that Gertie preserved them for freezing and many uses. She enjoyed family events and gatherings with song and festivities. Her home was the site of many large Easter egg hunts that had anywhere from 50 to 80 dozen eggs hidden and found by the Bridgham family cousins.

While living in Garden Valley with the family of seven children whom all were attending the Georgetown school, Gertrude had some
